

# B&K Makes Child's Play out of Environmental Testing

Lightweight, portable and battery-operated, B&K Precision's new family of environmental testers go anywhere, fit conveniently in any toolbox, and are quick and easy to use...

## No Kidding.

BK Precision's Environmental Testers can be used to test Humidity, Temperature, Sound, Air Velocity and Volume. Some models feature local and remote data logging capabilities. There is even a unique, versatile, go-anywhere pocket datalogger that can be used to quickly monitor environmental temperatures in multiple locations.

State-of-the-art dual function humidity temperature meters, full function temperature meters and probes, IR temperature meters, digital sound meters, and precision anemometers are all part of the new environmental product line.

For more information on how you can change environmental testing from a chore into child's play, visit our Web Site at [bkprecision.com](http://bkprecision.com) or call us toll-free at **(800) 462-9832**.
