

BK Precision **Makes** **Child's Play** **Out of** **Cable Testers**

Lightweight, portable and battery-operated, BK Precision's new family of deluxe cable testers go anywhere, fit conveniently in any toolbox, and are quick and easy to use...

No Kidding.

B&K Precision's Cable Testers can be used to test network cables such as 10baseT, 100Base2, RJ45, RJ11, 356A, TIA-568A, TIA-568B and Token Ring. One will test Ethernet twisted pair cable status over a variety of cable lengths, while another can trace cable faults even when cables are in bundles or in punch down blocks or wall plates. B&K Precision's universal cable tester will test just about any cable or harness

in a fraction of a second. There is a model for testing popular PC data cables and one that will detect digital/analog phone lines in offices, hotels, airports, etc. to protect a modem from damage.

For more information on how you can change cable testing from a chore into child's play, visit our Web Site at bkprecision.com or call us toll-free at (800) 462-9832.
